About me

Senior Shopify Developer with 8 years of hands-on experience building and maintaining Shopify and Shopify Plus stores. Skilled in custom theme development, Liquid, HTML/CSS, JavaScript, Shopify APIs, custom apps, checkout extensions, subscription integrations with Recharge, and third-party system integrations. Experienced in launching Shopify stores from scratch, implementing complex custom functionality, troubleshooting issues, and collaborating remotely with design teams across international projects.

Education

COMSATS University Islamabad, Lahore Campus (3.33 CGPA)

Bachelor of Science in Software Engineering

Dual Degree from **Lancaster University, UK**

Lahore, Punjab, Pakistan

2014-2018

PUNJAB COLLEGE (74.9%)

Intermediate in Computer Science

Lahore, Punjab, Pakistan

Experience

Almased

Full-time, Remote, Wellington, Florida, United States

Senior Shopify Developer:

Oct 2025 – Present

- Worked on helping finalize the UI/UX of their new Shopify store with their design team.
- Worked on creating and launching their complete Shopify store from scratch.
- We launched the store using a hybrid strategy to help the team ease into the Shopify ecosystem. The store was launched as a subdomain of the original site and is in the process of moving over to the main domain.
- Tracked and fixed bugs using Asana as a reporting tool.

CQL (a Shopify Platinum Partner)

Full-time, Remote, Grand Rapids, Michigan, United States

Senior Shopify Developer:

Sep 2025 – July 2026

- Worked on several Shopify Plus stores to implement custom features and complete redesigns. The following are some of the stores I've worked on:

- Maxi Cosi
- Roman & Williams
- Safety 1st
- Mxt.co
- Weatherables
- Slo Food Group
- Midwest Appliance Parts

- Tracked and fixed bugs using Jira as a reporting tool.

Life Supplies Brands Ltd

Full-time, Remote, London, United Kingdom

Senior Shopify Developer:

Feb 2023 – Jan 2026

- Implemented a custom account dashboard on the Shopify store to manage subscriptions and one-time purchases linked to the account using a middleware server and Recharge.
- Implemented a ship now feature to add a subscription or one-time item to the current list of subscriptions and charge the customer right away.
- Tracked and fixed bugs using Notion as a reporting tool.
- Upgraded the website design using the updated design tokens.

Riess Group

Full-time, Remote, Texas, United States

Senior Shopify Developer:

Dec 2023 – Sep 2025

- Worked on several Shopify Plus stores to implement custom features and complete redesigns. The following are some of the stores I've worked on:
 - Best Bully Sticks
 - Found Bikes
 - La Canadienne Shoes
 - Lalique
 - Mxt.co
 - Nikki Beach
 - Simon Pearce
 - Vestique
- Tracked and fixed bugs using Asana as a reporting tool.

SAGA Fitness

Part-time, Remote, Brisbane, Australia

Shopify Developer:

July 2023 – Oct 2023

- Developed the complete store website from scratch.
- Used XD designs to create pixel-perfect pages for the store using Liquid, HTML, JS and SCSS.
- Helped in Integrating Shopify Apps into the store.

LTV.ai

Part-time, Remote, Toronto, Canada

Shopify App Developer:

Mar 2023 – July 2023

- Helped integrate the current application with the Shopify platform.
- Developed the payment integration system for the app with the Shopify Billing API.
- Created extensions for post-purchase, checkout UI, Storefront widgets, and functions using the Shopify CLI tool for the Shopify app.
- Helped with the Shopify app submission/review process and meeting all the requirements to publish the app on the Shopify App Store.

Codilyze

Full-time, Remote, Germany

Front-end Developer:

Sept 2022 – Mar 2023

- Developed a store to allow music listeners to play songs like DJs.
- Tracked and fixed bugs using Jira as a reporting tool.
- Created a Shopify store as a marketplace which allows customers to buy and sell their own items and get paid.

A1 Cash and Carry

Full-time, Mississauga, Canada

Web Developer:

Feb 2021 – Feb 2023

- Created multiple complete Shopify Plus eCommerce websites from scratch based on the provided PSDs.
- Developed static websites for the brands owned by the company based on the PSDs provided.
- Built a custom Shopify app to connect multiple stores to monitor and sync inventory and product changes. The app also synced orders between stores to insert them into the company's point of sale (POS).
- Tracked and fixed bugs using ClickUp as a reporting tool.
- Worked on helping sync large number of products between the POS system (SAP Business One) and Shopify.

Codverse Software Solutions

Full-time, Lahore, Pakistan

Senior Shopify Developer:

Nov 2019 – Sep 2021

- Worked on multiple Shopify Plus stores to develop new themes and enhance the functionalities of other stores by implementing custom tailored solutions for different obstacles related to Shopify.
- Kruger Products: Worked on making and implementing the store from scratch.
- Nobis: Worked on stores of all regions for this brand to add new pages and implement the Serge Ibaka brand merger.
- Sparx Hockey: Worked on Implementing design changes and implementing custom solution for bundling multiple products and showing them as a single product throughout the store.
- Boie USA: Implemented new design for multiple pages of the store.
- Safe Direct: Implemented custom option system and design for the store to allow the admin to handle stock better.
- ExtremeApps: Working on developing public applications and publishing them on the Shopify App Store.
- Dropsu: Working on an application to provide Dropshippers and easy solution for bundling products and mapping them to products on Aliexpress. Allowing the merchants to transfer orders from Shopify to Aliexpress with ease.

ProperSix

Full-time, Remote, St. Julians, Malta

Security Manager:

Sep 2019 – Jun 2022

- Worked on handling the architecture of the servers based on Amazon AWS and their security.
- Monitoring the traffic and the safety of the company websites and servers.
- Deploying and updating current deployments smoothly.

Fliclicks Software Solutions

Full-time, Lahore, Pakistan

Software Engineer:

Sep 2018 – Nov 2019

- Next Agency: A health and life insurance management application. Worked on developing different parts of the application as well as integrating the Stripe Payment Gateway.
- Swell Rewards (Yotpo): Worked on integrating the application for all the stores provided by Yotpo to allow the rewards app to function properly. Designed and implemented pages on behalf of Yotpo for their rewards page for each of the provided websites.
